

## Changing your Google Apps password on a computer

1. Open [Gmail](#).
2. Click on your login name on the top right hand of your screen and select "Account"

3. You will be brought to the **Account Settings** page.
4. Click the **Security** tab at the top.
5. Click **Change password** in the "Pasword" section.
6. Type your current password and your new password. We highly recommend you create a unique password - one that you don't use for any other websites. See more password tips below.
7. Click **Change password**.
